Dear President,
please let us inform you on behalf of Slovak teachers about the current and long-term, situation in the education system of our country. The difficult and constantly worsening conditions in which the education process is carried out have resulted in the current strike of the teachers who have asked the government to fulfil their demands.

However, neither the government nor the Ministry of Education react to these demands. In fact, at some schools, there have been reported cases of intimidation of the teachers from the founders and headmasters of schools. We consider this a breach of the constitutional right to strike and we deem these practices as undemocratic.

Several days ago, the representatives of Slovak teachers were received by the president of Slovakia, Andrej Kiska, who too has categorically condemned the intimidation of the teachers.

We also regularly inform world media with the situation in Slovakia. In order to provide more information, we have attached the current press release along with relevant links to our activities.

Best regards,

Mr. Viktor Križo
